SUGGESTED PRACTICES

- As stated in the rules, all fish submitted for tournament entry must be released.
- Please handle all fish with respect and care, and use a boga or fish gripping type device to help handle your fish.
- Wet your hands before handling your fish.
- We encourage bait fishermen to use circle hooks. This will allow for fewer deep hook ups and easier fish releases.
- Deep hooked fish – if you have a deeply hooked fish, we encourage you to simply cut your line, take your measurement, photograph, and release the fish.
- Wade fishing – we encourage your guide/captain to wade the area with you and assist you in measuring your fish as you catch them for quick release. If you choose to retain your fish until you return to the boat, you are encouraged to use a “fish bag” type of retention system. These are manufactured by several companies including [ForEverlast](#) and [Hook Set Marine Gear](#). **Remember**, all submitted fish must be released. Please release as quickly as possible and take care in your handling of the fish.
- Videos will be posted showing proper measuring techniques and do's and don'ts. We encourage you to watch these.
- Videos will be posted on how to use the Fishing Chaos app
- Fishing Chaos will provide a “practice” tournament prior to the event. The Tournament encourages entrants to practice with the system in order to familiarize themselves with it prior to the tournament.
- We encourage you to visit [ReleaSense.org](#) for more information about handling and releasing fish.
